

# Event Report

INTERNATIONAL SYMPOSIUM ON RESTORATION OF DEGRADED PEATLANDS: connecting science with policy and practice

13 June 2022

Online and onsite (onsite by invitation only) at CIFOR-MoEF office, Bogor, Indonesia

## Background

---

Peatlands provide critical ecosystem goods and services such as food, energy, climate regulation and biodiversity. These ecosystem goods and services have been severely impacted through unsustainable land-use practices, which have altered the structure and function of peatlands with adverse impact on critical ecosystem goods and services. Scientists, policymakers and practitioners have become increasingly concerned about the impacts of unsustainable land-use practices on peatlands, with their concerns leading to a consensus to take urgent action.

This international symposium highlights recent findings from collaborative research and work by CIFOR-ICRAF and partners supported by the Republic of Korea's National Institute of Forest Science (NIFoS) on peatland restoration for food, energy and environmental conservation in Indonesia's Central Kalimantan and South Sumatra provinces.

## Objectives

---

- I. To strengthen and expand cooperative research for impact activities for global forestry science development
- II. To intensify bilateral cooperation between Korea's National Institute of Forest Science and CIFOR-ICRAF and expand innovative findings and good practices co-research toward Southeast Asia
- III. To strengthen and activate co-operative networks of Indonesian forestry organizations
- IV. To develop official development assistance evaluation technologies and results-based local communities development model on tropical peatlands.

### Expected outputs

- I. Expand a span of international bilateral cooperation between NIFoS and CIFOR-ICRAF
- II. Explore potentials of multilateral cooperation among NIFoS and Indonesian forestry research organizations
- III. Adopt best practices related to peatland restoration which intersect policy and practice

## Program/agenda of the event

---

### AGENDA

International symposium

Restoration of degraded peatlands: connecting science with policy and practice

**13 June 2022**

Time: 10:00 WIB (UTC+7)

Venue: CIFOR-ICRAF campus, Bogor, Indonesia

Delivery mode: Hybrid: onsite and virtual (Zoom)

Participants: onsite 50 people; Zoom 200+

| Time        | Agenda  | Participants   |
|-------------|---|--|
| 09.30       | Arrival at CIFOR-ICRAF campus and registration  |  |
| 10:00–14:45 | Symposium program   | Moderated by Dr. Mihyun Seol, seconded scientist, CIFOR-ICRAF  |
| 10:00–10:10 | Opening remarks   | Dr. Robert Nasi<br>Director General of CIFOR   |
| 10:10–10:20 | Congratulatory remarks  | Dr. Hyun Park,<br>President, NIFoS   |
| 10-20-10.30 | Keynote speech  | Ir. Ary Sudijanto, M.S.E<br>Head of the Agency for Standardization and Instruments of Environment and Forestry (BSI LHK)<br>Ministry of Environment and Forestry<br>[Confirmed via online] |
| 10:30–11:30 | Session 1: High-level panel discussion<br>Restoration of degraded peatland science, policy and practice | Facilitated by Dr. Michael Brady,<br>principal scientist and CIFOR-ICRAF's Value Chains, Finance and Investment Team Leader  |

|             |   |  |
|-------------|---|--|
|             | <p>With five distinguished panelists</p> <p>1] MOEF policies, technical guidance, and evaluation peatland restoration activities in Indonesia</p> <p>2]ITPC’s efforts to converse and sustainably manage peatlands in Indonesia and beyond</p> <p>3] Climate-smart agrosilvofishery approach of peatland restoration in South Sumatra</p> <p>4] Restoration of degraded peatlands for bioenergy and multiple ecosystem goods and services</p> <p>5] Peatland restoration, green economy and community development in changing climate: lesson learn from Central Kalimantan</p> | <p>Ir. Sri Parwati Murwani Budisusanti, M.Sc<br/>Director of peatland ecosystem degradation control, Directorate General of Pollution and Environmental Damage Control, Ministry of Environment and Forestry [Confirmed via online]</p> <p>Prof. Dr. Haruni Krisnawati, International Tropical Peatland Center</p> <p>Prof. Dr. Rujito Agus Suwignyo, Center of Excellence on Peatland Research, Sriwijaya University [Confirmed via online]</p> <p>Prof. Dr. Budi Leksono, BRIN</p> <p>Dr. Afentina, Department of Climate Change, University of Palangkaraya</p> |
| 11:30–11:50 | Q&A   |  |
| 11:50–13:30 | Lunch break and networking  |  |
| 13:30–14:10 | <p>Session 2: Five presentations from specialists</p> <p>Peatland restoration in Indonesia: lessons from the field</p> <p>1] Paludiculture to restore degraded peatland</p>   | <p>Moderated by Himlal Baral, Senior Scientist, CIFOR-ICRAF</p> <p>Mr Bastoni, M.Sc, BRIN [Confirmed via online]</p>   |

|             |  |  |
|-------------|--|--|
|             | 2] Peatland restoration and bioenergy in Central Kalimantan  | Ms. Siti Maimunah, Institut Pertanian Stiper   |
|             | 3] Inland fishery on degraded peatlands: lessons from Perigi | Dr. Mohamad Amin, Sriwijaya University<br>[Confirmed via online]                             |
|             | 4] Landowners' preferences on peatland restoration models    | Ms. Yustina Artati, CIFOR-ICRAF  |
|             | 5] Strategies for expanding peatland and restoration project | Dr. Eunho Choi, NIFoS<br>[Confirmed via online]  |
| 14:10–14:30 | Q&A  |  |
| 14:30–14:40 | Closing remarks  | Prof. Dr. Herry Purnomo,<br>Senior Scientist and Deputy Director of<br>CIFOR-ICRAF Indonesia |

### Key findings/results

Peatland restoration in Central Kalimantan and South Sumatra is crucial for mitigation of the climate crisis, elimination of toxic haze incidents, food security, bioenergy and environmental conservation.

In accordance with the *Long-Term Strategy for Low Carbon Climate Resilience 2050*, the Government of Indonesia is working on greenhouse-gas emissions' reduction to keep Earth's temperature within the limits of the Paris Agreement.

Korea's National Institute of Forest Science (NIFoS) is cooperating with CIFOR-ICRAF not only on current projects but also with future projects. NIFoS would like to support peatland restoration in Indonesia and agrees to establish substantial strategies and roadmaps to achieve common goals.

Peatland restoration is essential to be conducted by a range of stakeholders, based on CIFOR-ICRAF's collaborative work, such as the central government, local governments in Central Kalimantan and South Sumatra, international organizations, research institutes, universities and NGOs with support from developed countries.

## Follow-up action(s)

---

1. It is time to broaden our perspective and consider people and their livelihoods in relation to restoration work. Beyond 'planting trees' only, studies about 'trees to survive' should be conducted: 'plant properly the proper trees in the proper and stable soil'.
2. It is time to pursue *climate-smart solutions*: 1) increase productivity of land; 2) enhance resilience of farmers; and 3) reduce emissions.
3. It is time to diversify our studies for sustainable community-based restoration. Peatlands are resourceful storages in nature. Peatlands provide multiple ecosystem services as well as climate control by storing carbon. From now on, many diverse studies are necessary, such as on flood control, water supply, governance, supports to the livelihoods of communities through agrosilvofishery, agroforestry and paludiculture.
4. It is the time to set up a robust fire management system to protect peatlands, for a fire-free environment.

## Conclusion

---

So far, we have produced some significant results from our research. Now, we need to consider designing plans that embrace the consequences of scaling up. We need a study to clarify how to benefit farmers who live in peatlands with timber and honey, such as market studies to connect their production to real income, to reduce poverty. We have found that nyamplung is a valued

source of timber and its flowers produce honey well. We need to conduct research to clarify some issues in terms of sustainability. Not only for farmers but also the environment, we need to move forward for scaling up our projects.
